

File Code: 3400

Date: February 6, 2008

Mr. Wayne Budrus
U.S. Army Corps of Engineers
Huntington District
502 8th Street
Huntington, WV 25701

Dear Mr. Budrus:

Summaries of the 1983-2007 gypsy moth trapping program conducted at six U.S. Army Corps of Engineers sites within the Huntington District are enclosed for your information (Table 1). Also enclosed are maps showing the trap locations (Figures 1a-1d). The purpose of the trapping program is to monitor low-level gypsy moth populations and help determine when more intensive survey methods should be employed.

The 2007 trap catch averages at Alum Creek, Mohawk Dam and North Branch Kokosing River have remained fairly consistent with trap averages from last year and total trap catches were 114, 50 and 10 male moths, respectively. Deer Creek Lake continues to have very low male moth catches. Delaware Lake counts have been increasing gradually over the past 4 years. Dillon Lake trap counts this past season increased from 83 in 2006 to 106 male moths in 2007. Based on the results of the trapping program at each Corps site, gypsy moth populations will not have an impact on the forest resources at these sites in the immediate future.

Figures 2a-2d show the 2007 gypsy moth Slow-the-Spread (STS) trapping results in Ohio. The inserts on each figure show close-ups of the STS results in relation to the Corps site properties. For more information regarding the STS program, visit <http://www.gmsts.org>.

It is important for Corps to look for other gypsy moth life stages while performing their normal duties. Visit our GM Digest web site located at <http://www.na.fs.fed.us/fhp/gm/index.shtm> for publications that are helpful in identifying the different gypsy moth life stages.

We would like to continue the trapping program at the same intensity at all six Corps sites in 2008. Thank you for your continued cooperation and if you have any questions regarding these results, please call Karen Felton at (304) 285-1556.

Sincerely,

ROBERT G. LUECKEL
Field Representative
Morgantown Field Office
